

## Control mice and control your costs

SUPERPROOF™ is the most effective mice infestation solution for social housing providers and local authorities for one main reason – it works.

We have developed **unique** technology and techniques, combined with the latest ideas in habitat manipulation, to proof homes against mice in just one visit.

**It is what makes SUPERPROOF™ the UK's only sustainable mice pest solution**

**IT'S GUARANTEED  
TO WORK**

**IT'S COST EFFECTIVE**

**IT'S HUMANE AND  
ECO-FRIENDLY**

**IT MAKES TENANTS  
HAPPY**

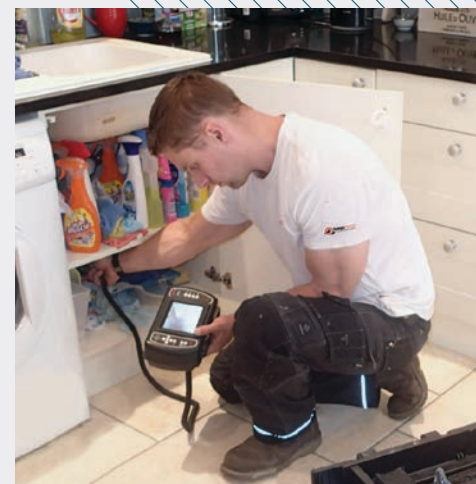

## It pays to SUPERPROOF™ it

SUPERPROOF™ is a thorough and effective solution to mice infestation. Superproofing 1,000 homes over five years costs 40% less than baiting\*.

\*Based on average costs and industry-standard success rates

**With SUPERPROOF™, there are:**

- No** kitchen removals or refits
- No** main contractor 'builder proofing'
- No** top up baiting visits for problem cases
- No** legal costs
- No** rehousing costs

A single visit fix in over 90% of cases. No fixtures or fittings removed. Properties guaranteed mice-free for a year.

VS

Baiting works in fewer than 1 in 3 first visits, requiring repeat visits. Sometimes it never works.

Single fix solution means treatment costs across whole housing stock are reduced, controlled and quantifiable.

VS

Repeat visits, and extra management costs, make baiting more costly and hard to budget for.

No poisons (rodenticides), so eco-friendly, and preferred by tenants concerned about children, pets and wildlife.

VS

Rodenticides can kill pets and wildlife. Mice can become tolerant to poison, and behaviourally-resistant to it.

The humane way to control mice, so supported by many tenants, wildlife groups and animal protection agencies.

VS

Mice can take days to die. Decomposition can cause extra environmental problems and secondary poisoning risks.

Single visit fix means less fuss, so generates impressive satisfaction rates, especially for tenants with phobias, children and pets.

VS

Lack of effectiveness of baiting generates additional complaints to housing staff and local council representatives.

## The SUPERPROOF™ advantage

Mice infestation causes damage worth £millions, serious hygiene problems and big worries for your tenants. With SUPERPROOF™, those problems go away – along with the mice.

**All you're left with are:**

Happy Tenants

Happy Housing Officers

Happy Finance Manager

**SUPERPROOF™**  
POISON-FREE RODENT CONTROL
